

# Configure Defender for Endpoint Settings

At the end of this episode, I will be able to:

1. Configure Defender for Endpoint settings

Learner Objective: *Understand the Defender for Endpoint settings available in Microsoft 365 Defender*

Description: In this episode, you will learn about the many settings that are capable for the Microsoft Defender for Endpoint feature. These settings can be found in the Endpoint settings in the Microsoft Defender for Endpoint interface.

- 
- Here are the settings available for Endpoints in Microsoft 365 Defender:
    - General - here you can configure Advanced Features, Licenses, Email Notifications, Auto Remediation
    - APIs - SIEM
    - Rules - Alert Suppression, Indicators, Web content filtering
    - Configuration Management - Enforcement Scope
    - Device Management - Onboarding, Offboarding
    - Network Assessments - Assessment jobs
-
