

Implement Multi-Factor Authentication

At the end of this episode, I will be able to:

1. Implement and manage multi-factor authentication (MFA)

Learner Objective: *Learn about MFA in Azure AD and MS365*

Description: In this episode, you will learn about MFA in Azure AD.

-
- Security defaults dictate MFA for users of tenants created after October 21, 2019.
 - To see if your tenant is following these defaults:
 - Azure Portal -> Azure Active Directory -> Properties -> Manage Security Defaults
 - You must be a Global admin to manage MFA
 - Use the MS365 Admin Center to TURN OFF legacy per-user MFA
 - Ensure that Modern Authentication is enabled for your organization:
 - MS365 Admin Center -> Settings -> Org Settings -> Modern Authentication
-
