

Implement Endpoint DLP

At the end of this episode, I will be able to:

1. Implement Endpoint DLP

Learner Objective: *Implement endpoint Data Loss Prevention with Microsoft Purview*

Description: In this episode, you will learn the basics about implementing Endpoint Data Loss Prevention (DLP) with Microsoft Purview.

- It is important to check the settings in Microsoft Purview that will apply to all DLP policies that protect content on endpoints (Windows and Mac only)
 - The settings are:
 - Advanced classification scanning and protection
 - File path exclusions for Windows
 - File path exclusions for Mac
 - Setup evidence collections for file activities on devices
 - Network share coverage and exclusions
 - Restricted apps and app groups
 - Unallowed Bluetooth apps
 - Browser and domain restrictions to sensitive data
 - Additional settings for endpoint DLP
 - Always audit file activity for devices
 - Printer groups
 - Removable USB device groups
 - Network share groups
 - VPN settings
-
