

# Introducing Microsoft Purview

At the end of this episode, I will be able to:

1. Describe Microsoft Purview

Learner Objective: *Describe the fundamentals about Microsoft Purview*

Description: In this episode, you will learn about Microsoft Purview. This includes information such as what the product does and how you can use the product.

- 
- Microsoft Purview is a family of data governance, risk, and compliance solutions.
  - The goal is to help your organization govern, protect, and manage all of your data.
  - Purview combines the former Azure Purview and Microsoft 365 Compliance solutions.
  - The goals:
    - Gain visibility into data across your organization
    - Enable access to your data, security, and risk solutions
    - Safeguard and manage sensitive data across clouds, apps, and endpoints
    - Manage end-to-end data risks and regulatory compliance
    - Empower your organization to govern, protect, and manage data in new ways.
  - Services protected include:
    - Teams
    - SharePoint
    - OneDrive
    - Exchange
    - Azure Storage Services
    - Power BI
    - SQL/Hive
    - AWS S3
    - And more...
  - Governance tools help to:
    - Create an up-to-date map of your entire data estate
    - Identify where sensitive data is stored
    - Create a secure environment for authorized data consumers to find valuable data
    - Generate insights about how your data is stored and used
-
