Plan for Identity Protection

At the end of this episode, I will be able to:

1. Plan for identity protection

Learner Objective: *Plan for identity protection*

Description: In this episode, you will learn about Azure AD Identity Protection and how it helps organization detect, investigate, and remediate identity-based risks.

- Azure AD Identity Protection helps organizations detect, investigate, and remediate identity-based risks.
- This information can be fed into the Conditional Access platform of Azure.
- This information can also be sent to a SIEM for further analysis and investigation.
- Detect risks:
    - Anonymous IP address usage
    - Password spray attacks
    - Leaked credentials

- Three key reports:
    - Risk detections
    - Risky sign-ins
    - Risky users

- Risk-based Conditional Access policies can be enabled.
- Full use of the feature requires Azure AD Premium P2 license

---
